Every Student Can Be a Reader: A Balanced Literacy Program

Debbie Kilmer-Mesure

What follows is a summary of a proposal to enhance the reading and writing skills of reluctant readers. It is called the Balanced Literacy Program. The acronym R.A.P., Reading Apprentice Program, captures the purpose and process of the program.

"When teachers, librarians and parents concentrate on plans to foster a love of reading in each child, communities become caring, literate places in which to live." Charlotte Huck

"Students who have been unsuccessful throughout elementary, middle and secondary school frequently adopt a negative stance towards reading that becomes more difficult to modify" Mathewson, 1994 (Appendix A)

It is reasonable, therefore, to suggest that creative and explicit intervention for learning is a necessary curriculum skill required of all teachers. Pollack (1998) makes the point that mentor programs do work and, when boys meet on a regular basis with a buddy /coach as in the proposal I will outline below, boys demonstrate improved attitudes toward reading. They also develop positive self-esteem and other academic competencies.

The Ontario Ministry of Education Report "Me Read? No Way" suggests that every school should have a plan for helping boys to succeed in literacy skills. Whole literacy policies are needed to plan for the special needs of boy learners and reluctant readers. Strategies include inviting boys to select from a broad range of reading genres. Specifically, this means that teachers should target readers with material, which they want to read. Read with them, read to him and let him choose what he wants to read.

The key to unlocking the framework to cooperative and literate learners requires a rich background that is committed to lifelong learning. Literacy is a powerful system, which demands the process of effective teaching practice while building on cultured reading experiences. Moreover, language and literacy learning demand observation of the common curriculum, flexibility of instruction and a common goal, which promotes the treasure of reading. This program provides opportunities for mentors to discuss reading and writing options and work together to find an appropriate learning accommodation.

I believe that one must capture the potential of a struggling reader at an early age. As an alternative education teacher, it saddens me when I observe the potential in teenagers lost to frustration because they struggle with literacy skills. Many of these students (mostly boys) were identified as behavioural problems in their primary years and experienced failure and defeat in school. They often turned to alternative and often unconventional ways to communicate their inadequacies. After reading work by Patricia Paterson and Lori Elliot (1994/2006), I became intrigued by their project, "Struggling Reader to Struggling Reader: High school students' responses to a cross-age tutoring program". Because I am working toward my Reading Specialist Qualifications, I envisioned a program, which was similar but different, and one, which could be applied to a variety of settings. My experience with teenage boys, with their reluctance as readers and subsequent limited literacy skills, compelled me to try to design a program which could be adopted by the school at which I now teach.

The reading tutor program I have designed is based in kind on the underlying philosophy of the outreach Lauback Reading Program, "Teach One, Reach One" which is "we learn best by teaching someone else". The aim is to develop positive attitudes, increase reading skills and foster literacy enrichment by matching a "struggling reader to a struggling reader". However, unlike many buddy reader programs, this program matches elementary students, ages 7-12, with secondary students, ages 16-21, both of whom are struggling readers. The concept of "mirrored experiences" is a key component for "building relationships". According to Elliot and Patterson, "bringing students together with similar backgrounds and social circles" promotes the ability to bond quickly with one another.Matching struggling readers from junior school with struggling readers from a secondary school setting is seen as cross-age tutoring.

The R.A.P program is designed to address the needs of all participants. Thus, while promoting literacy in an enriched environment and encouraging partnerships between struggling readers and apprentices, R.A.P also accommodates the need to encourage academic and individual success. In consultation with the Ontario Ministry of Education, R.A.P has received encouragement and support because participants will (pending final approval) receive one credit value for training and implementation over one semester under the Leadership and Peer Mentoring course or the GLD
The apprentice:
- provides the R.A.P. Teacher with a completed Reader Application Form. (Appendix sample B)
- provides the R.A.P. Teacher with the necessary information required which identifies the junior apprentice’s special needs, learning modalities, preferences and interests.
- provides an “about me” information sheet or
- provides the R.A.P Teacher with a Letter of Introduction of himself or herself to the senior apprentice partner. This communication can be in written or artistic form, indicating his/her interests in a variety of genres.
- provides the R.A.P. Teacher with a written consent form to initiate the program in their preferred reading facility.
- maintains a journal of events from each R.A.P session.

The Secondary School Apprentice
- provides the R.A.P. Teacher with a completed Senior School Apprentice Participation form, (Appendix sample C).
- provides a volunteer police and vector-screening test.
- provides the R.A.P. Teacher with the necessary information required which identifies the Senior Apprentice’s special needs, learning modalities, preferences and interests
- provides the R.A.P Teacher with a Letter of Introduction of himself or herself to the junior apprentice partner. This communication can be in written or artistic form, indicating his/her interests in a variety of genres.
- maintains a journal of events from each R.A.P session, which will contribute towards a portfolio for as culminating activity.
- provides the R.A.P. Teacher with a written consent form, which includes their classroom teacher endorsement. The credit courses, which may be offered in conjunction with this program, are the GLD10, Drama or LLL courses.
- earns a grade 9 English credit.
- agrees to fulfill the identified time commitment for hands on reading apprentice guidelines. (10 weeks accumulation)
- fulfills in-class literacy education training, strategic lesson planning and service delivery and apprentice expectations.

The R.A.P. teacher will prepare the apprentice by teaching what is meant by Guided and Shared Reading, Independent Reading, and a Read-aloud activities (etc). Strategies will be taught to prepare the senior reading apprentice for program implementation. An integration of “interest” content areas will be included. Differential instruction will also be encouraged for “self-direction and “intrinsic motivation”. (Shaw, 2004: Appendix E).

3) Explanation of Assessment:

There are a variety of assessment tools to be considered for the implementation and evaluation of R.A.P. Assessment for this program will be ongoing for each student to ensure that targeted learning outcomes specific to his or her stage of educational development are met.

Some of these assessments may include:
- Initial informal pre- and post- baseline achievement testing of the junior and senior student apprentice.
- El Paso
- Tass
- Dolch Sight Word Test
- 44 primary sounds of the English language. (level 1 review: basic information, (Appendix E/uoregon.edu)
- Portfolio Assessment and Evaluation
- Consultation of junior testing with their SERT.
- R.A.P. Teacher summarizes one to one conferences with Senior R.A.P.
- Informal identification of learning modalities. (Appendix F)
- Maintenance of a “visual chart of observations” of junior apprentice success.
- User friendly junior and senior assessment of comprehension, conventions, interpretation, evaluations, synthesis, and content; assessment. (Appendix G)
- Ongoing observations of reading behaviours.
- Q Charts
- Observation of the relationship between the two paired apprentices. They must “mirror similar experiences” as a “key component for the relationship (which) creates a bond of community, experiences and social experiences.” (Elliot & Paterson, 2006)
- Journals and Portfolios (Appendix H, sample guidelines)

Observational assessments include:
- Read Out Loud activities; picture walks; “Enhanced Learning Assessments’; observations, checklists, informal collaborative assessments, apprenticeship assessments, interest and self-esteem assessment/observation of the connection with the “love of reading model”, (Elliot &
TEACHING & LEARNING

Paterson, 2006).

- Senior Apprentices prepare teacher directed lessons for R.A.P. sessions. They also prepare for read aloud, share conversations with students and model good reading technique. Students will learn how reading out loud promotes literacy.
- Criteria based on approved informal assessments and evaluation based on the “Six Traits of an Effective Reader”.

**MONDAY**

<table>
<thead>
<tr>
<th>Home School</th>
<th>READ ALOUD FOR COMPREHENSION.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>In class lesson. Please note: teaching comprehension is ongoing. This is only a sample.</td>
</tr>
</tbody>
</table>

**TUESDAY**

| Shared Reading Environment and apprenticeship partnership time. | R.A.P. session in the Elementary School Library. The Junior student selects a book of his/her choice. 1. Pre-conferences will take place. 2. Read Aloud session. 3. Q chart will guide post conferences. *Ask junior apprentice to select another book from the library. The Senior student will borrow it for next day’s class and R.A.P. session. |

**WEDNESDAY**

<table>
<thead>
<tr>
<th>Home School</th>
<th>FOCUS ON COMPREHENSION</th>

Boys Don’t Read – It’s True!

David Skuy

Few educational experts would disagree that school-aged boys are falling behind their female counterparts in terms of reading and writing. A gap that both increases with grade levels, and has increased in recent years. Recent studies suggest this trend is not isolated to one geographic region or demographic group. It is all boys across North America and Europe. As a father of a seven-year-old son, I worry about my son reading as he gets older. As an author of a Young Adult book series for boys, I worry if there is a market for my books. By the time high school hits over half of all boys describe themselves as non-readers. To make matters worse, the publishing industry has figured this out—and ‘Boy Books’ have disappeared from the shelves (apart from Harry Potter and its legions of copycats). The economic impact of poor literacy skills for half the population is self-evident. The spiritual impact of a child deprived of one of the great pleasures in life is less obvious, but perhaps even more detrimental to society.

As a young boy I grew up reading sports stories and playing hockey. So what better subject matter for my first foray into the children’s lit genre? “Good luck trying to sell the idea let alone the manuscript,” a publisher once told me. “Boys don’t read.”

Boys don’t read? That was the first I’d heard of it. My daughter loved reading and I just assumed my young son would also. I began to research the subject—and sure enough, I found out my publisher friend was absolutely right. It seems that once boys hit eight or nine years old, they lose interest and stop reading.

In Canada, the Ontario government recently conducted an extensive study of literacy levels. In 2004, it produced a study—Literacy for Learning—the Report of the Expert Panel on Literacy in Grades 4 to 6 in Ontario. The report shows that boys are dropping out of arts courses as soon as they can. In testing of primary school children, girls consistently outperform boys in reading and writing tests by a wide margin. This is consistent with international results. The same findings were reached in a recent study of 36 countries (see Newsweek Magazine, January 30, 2006). Business leaders are beginning to take notice, complaining that recent university graduates often lack basic literacy skills.
